# CRASH PROTECTION SERIES CRR

## PRODUCT ADVANTAGES

## Adjustable triggering sensitivity

By controlling the air pressure, you can optimally match the sensitivity to your application.

## Integrated sensors

If there is a collision, the integrated sensor gives a signal to the control system to trigger an emergency stop.

### Automated reset

After an emergency stop, you can reset the collision protection from a safe distance. This is an advantage primarily when entering the system is undesirable, dangerous or is possible only with difficulty.
