

2-JAW PARALLEL GRIPPERS

SERIES GEP2000

▶ PRODUCT ADVANTAGES

🔗 IO-Link

“The electric compact one”

▶ Largest stroke in small installation space

Do you require a large stroke, due to the fact that you are operating either a form fit gripper or a large range of parts but the installation space and the load capacity of your application is limited? Then this gripper is perfect for you!

▶ The simplest activation

It is your choice whether you want to control the gripper by means of I/O ports—like a valve—or if you prefer the version with IO-Link. Both have this in common: they are easy to integrate into your control system.

▶ Positionability via IO-Link

Gives you the ability to position the gripper jaws of the IL-03 variant. This means the stroke can be adjusted to the workpiece very flexibly. As a result, you save time and avoid interference contours in the process.

▶ SERIES CHARACTERISTICS

Installation size	Variants				
	GEP20XX	IL-00	IL-03	IO-00	IO-05
IO-Link	•	•			
Digital I/O				•	•
Positionable			•		
10 million maintenance-free cycles (max.)	•	•	•	•	•
Magnetic field sensor				•	
Integrated sensing	•	•			•
Gripping force adjustable	•	•	•	•	•
Self locking mechanism	•	•	•	•	•
IP 40	•	•	•	•	•

► BENEFITS IN DETAIL

- ① **Control**
 - Via I/O ports (IO) or via IO-Link (IL)
- ② **Mounting and positioning**
 - mounting possible from several sides for versatile positioning
- ③ **BLDC motor**
 - wear-resistant brushless DC motor
- ④ **Helical worm gear**
 - self locking mechanism in case of power drop
- ⑤ **Synchronization**
 - via rack and pinion
- ⑥ **Position sensing**
 - Permanent magnet for direct query of jaw movement via magnetic field sensors
- ⑦ **Gripper jaw**
 - individual gripper finger mounting
- ⑧ **Removable centering sleeves**
 - quick and economical positioning of the gripper fingers

► TECHNICAL DATA

Installation size	Stroke per jaw [mm]	Gripping force [N]	Weight [kg]	IP class
GEP2006	6	40 - 145	0.18	IP40
GEP2010	10	50 - 200	0.31	IP40
GEP2013	13	90 - 360	0.54	IP40
GEP2016	16	125 - 500	0.9	IP40

► FURTHER INFORMATION

Adjustable gripping force

- Four-level gripping force adjustment via rotary switch for digital gripper control
- For the IO-Link variant, gripping force can be conveniently adjusted using the control system

Operating safety

- Mechanical self-locking mechanism, which means that in the event of a power failure, the workpiece is held securely
- Gripper can be mechanically opened by means of an Allen key

2-JAW PARALLEL GRIPPERS

SERIES GEP2000 FUNCTIONAL DESCRIPTION

SENSORS

1-point magnetic field sensors – MFS

For non-contact sensing of the piston position

The sensor is clamped in the C-groove of the gripper and detects the magnet attached to the gripper jaws. The MFS02 is available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

2-point magnetic field sensors – MFS

With two freely programmable switching points

Using the programming unit integrated in the cable, two switch points can be freely defined for this sensor. To do so, the sensor is clamped in the C-groove, the gripper approaches position one and the position is taught in using the teach button. Afterwards, the second position is approached with the gripper and programmed. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

CONNECTIONS / OTHER

Plug-in connectors

For extending and fabricating the connection lines

Cables with a length of 5 m with exposed leads are available. Depending on the specific needs, the cables can be shortened or fabricated with connectors in sizes M8 and M12. A 5 m long cable with connector / socket is available for the IO-Link connection.

Adapter plate

Additional screw connection option

By attaching the optional adapter plate, the gripper can also be screwed on vertically (from above) if the fastening options integrated into the gripper housing cannot be used for space reasons.

2-JAW PARALLEL GRIPPERS

SERIES GEP2000 FUNCTIONAL DESCRIPTION

CONNECTIONS / OTHER

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

CONTROL

GEP2000 SERIES

1 IO-LINK CONTROL — GEP2000IL

2 DIGITAL CONTROL — GEP2000IO-00

3 DIGITAL CONTROL + INTEGRATED ANALOG SENSING — GEP2000IO-05

1**▶ IO-LINK CONTROL — GEP2000IL**

- ▶ Single-cable solution—control system data, status/sensor data and power supply over a single cable
- ▶ Bi-directional data transmission
- ▶ Gripping force and gripping speed can be configured using software
- ▶ 32 workpieces data sets can be programmed
- ▶ Parts detection in range of +/- 0.05 mm with freely teachable area
- ▶ Status data such as temperature and cycle number can be read out
- ▶ Can be integrated into ZIMMER HMI
- ▶ Positionable (only variant IL-03)

2**▶ DIGITAL CONTROL — GEP2000IO-00**

- ▶ Single-cable solution—control system data and power supply over a single cable
- ▶ Gripper commissioning by means of digital signals
- ▶ Optional digital gripper position feedback via external sensors
- ▶ Gripping force adjustment in four levels to the object being gripped, using rotary switch
- ▶ Can be integrated into ZIMMER HMI

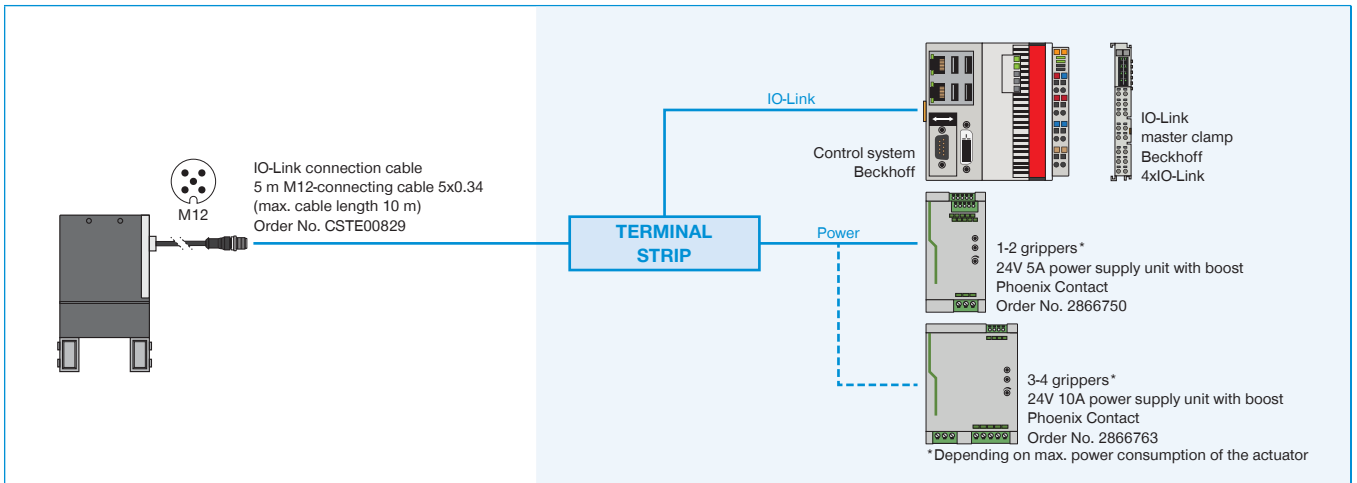

3**▶ DIGITAL CONTROL + INTEGRATED ANALOG SENSING — GEP2000IO-05**

- ▶ Single-cable solution—control system data, sensor data and power supply over a single cable
- ▶ Gripper activation by means of digital signals
- ▶ Integrated analog feedback of the gripper position
- ▶ Gripping force adjustment in four levels to the object being gripped, using rotary switch
- ▶ Can be integrated into ZIMMER HMI

▶ GEP2000IL (IO-LINK) WIRING TO IO-LINK MASTER IP67 (SIEMENS)

▶ GEP2000IO-00 (DIGITAL IO) WIRING TO CONTROL CABINET

▶ GEP2000IO-05 (DIGITAL IO / ANALOG) WIRING TO CONTROL CABINET

IO-LINK MEETS DIGITAL I/O

SMART COMMUNICATION MODULE

IO-Link meets digital I/O

The Smart Communication Module (SCM) is a master gateway that is suitable for all IO-Link components. With its two channels, the SCM can control two devices and on a functional level, offers the direct implementation of IO-Link to

digital I/O. The module thus makes it possible to integrate IO-Link devices into a digital infrastructure and utilize almost the full extended range of functions of the IO-Link device.

▶ PRODUCT ADVANTAGES

- ▶ Translates IO-Link to digital inputs and outputs digital I/O) and from digital I/O to IO-Link
- ▶ Easy control of intelligent IO-Link grippers via 24 V digital I/O
- ▶ Configuration and training take place using the corresponding intuitive guideZ software
- ▶ Can be used with one or two grippers depending on the flexibility required
- ▶ Up to 15 different workpieces can be trained for one gripper

▶ BENEFITS IN DETAIL

- 1 Status**
 - Status display of SCM and IO-Link device
- 2 Ethernet RJ45**
 - Temporary connection for gripper configuration
- 3 Digital input**
 - Digital inputs for controlling the gripper actuators
- 4 IO-Link / Device 1**
 - Gripper module 1 connection
- 5 Digital output**
 - Digital outputs for monitoring the gripper sensors
- 6 IO-Link / Device 2**
 - Gripper module 2 connection
- 7 Power supply**
 - Voltage supply SCM and gripper

Order no.	Technical Data
	SCM-C-00-00-A
Control	Digital I/O
IO logic	PNP
Number of grippers, max.	2
Number of pins (control system input)	12
Number of pins (control system output)	12
Configuration for interface	Ethernet RJ45
Mounting options	35 mm top-hat rail
Voltage [V]	24
Load supply peak current [A]	10
Logic supply peak current [A]	1
Operating temperature [°C]	5 ... +50
Protection to IEC 60529	IP20
Weight [kg]	0.26

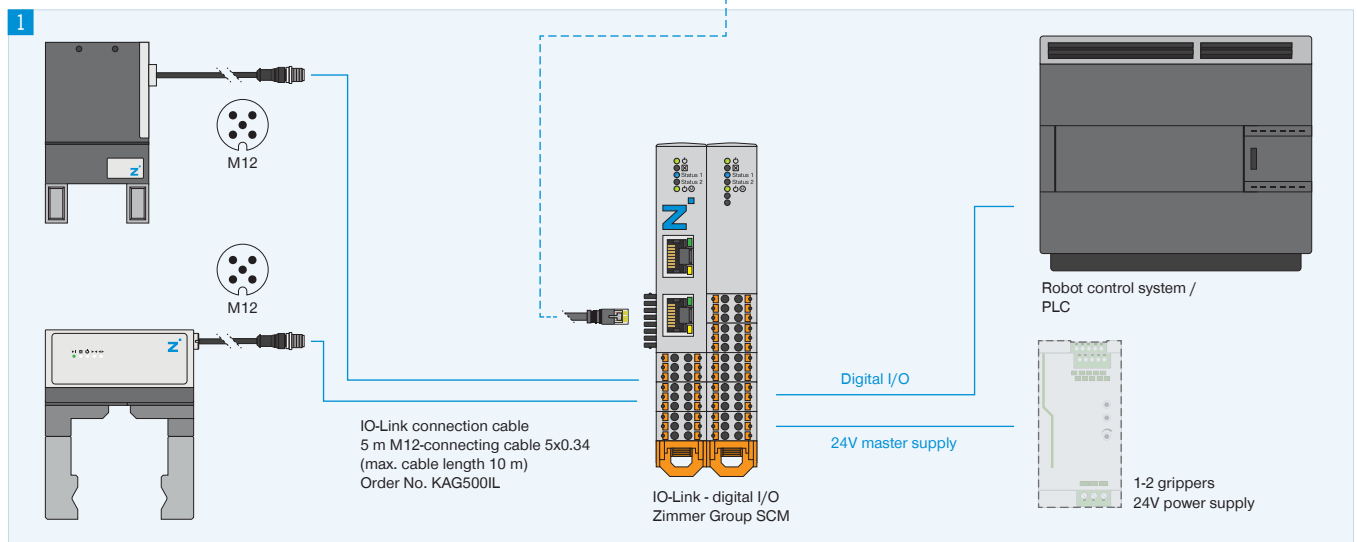

TOPOLOGY

CONNECTION

Configuration and operation

Up to two Zimmer IO-Link devices can be connected to one Smart Communication Module. The digital inputs and outputs are wired directly to the robot controller or PLC. Simple digital control enables bidirectional communication. To configure the gripper parameters, a temporary network connection is established to a commercially available PC.

As soon as the parameters have been configured intuitively, this connection is no longer necessary. Next, the handling unit is automatically controlled directly via robot controller or PLC.

1 Connection

- ▶ IO-Link gripper
- ▶ Digital I/Os on the robot control system/PLC
- ▶ Power supply

2 Configuration

Temporary network connection via PC for use of the guideZ, expertZ and monitorZ software
